ASP.NET Data Presentation Controls Essentials

Hits: 156

Description: Packt is pleased to announce a new book titled "ASP.NET Data Presentations Controls Essentials" which shows users how to get the most from the ASP.NET data presentation controls to easily display and manage complex data in their web applications.

The ASP.NET Data Presentation Controls are server controls to which users can bind data to organize and display it in different ways.

This book shows how to get the most from these controls by taking users through each of the major data presentation controls in ASP.NET, getting them started and then shows how to use them in the applications for managing the data.

This book is for ASP.NET developers who want to display or manage data in ASP.NET applications.

Resource Specifications
