Slideviewer.cgi

Hits: 2,796

Description: Slideviewer.cgi is designed to cut down the work needed for presenting an HTML slideshow by having all the images and titles defined in a file and the script does the rest. Features include: Next, Previous, Start and End buttons, Ability to go forwards or backwards, Choice of autoforward or manual change of slides, Dynamically resize the images, Set a cycle mode to have continuous viewing of your show, Jump to any slide in the show by specifying the slide number, Jump to any slide via a slide index popup window, Jump to a randomly selected slide, and more.
