PictureRight

Hits: 3,922

Description: PictureRight is a Java applet that consists of several dynamic features on a small toolbar for you to adjust the picture properties on the fly. It will make your picture look better on different PC monitor and web browser settings. Worry no more about how your picture looks on other people's machines. Main features include dragging, zooming, brightening, sharpening, contrasting, tinting, saturating, and resetting control on pictures.

Resource Specifications

Platform(s):	linux, windows, freebsd, osx, sun
