## CFX\_ECHO Secure Payment Module

Hits: 1,869

**Description:** CFX\_ECHO tag is a custom tag that drives all types of real-time credit card and check transactions using ECHO merchant processing's free secure payment gateway and open-source real-time software. Supports system check, address verification, authorization and deposit, deposit, credit, commercial card, electronic check debit, and more. CFX\_ECHO tag makes it easy to connect to ECHO. Ideal for all commerce applications. Perfect for ISP/IPPs to use for billing their clients, since this supports electronic checks as well.

### Resource Specifications
