Locked Area Pro

Hits: 3,273

Description: Locked Area Pro is an advanced member's area management system which is based on the popular Locked Area Lite software. It offers very high levels of security and is very easy to install and maintain. It offers many useful features including automated signup, user account validation, optional random password generation and optional admin approve/decline account feature. The script also offers a member management panel giving the member full control over their account. The script also comes with a powerful administration panel with online administration of users, backup and full customisation facilities from the browser. Also includes a built-in statistics system, PayPal subscription payments integration and automatic account expiration and supports a text-based or mySQL database.
