Site Bugs Report System

Hits: 947

Description: A site bug reporting system that lets a user reports a bug on your site. As a safety to discourage users from submitting reports using a fictitious e-mail address, this thank you confirmation will contain a link to a temporary PID file. When the user clicks the confirmation link, the report is moved from the temp data directory and is e-mailed to you or site admin. If the confirmation link is not clicked, the program will scrub the files at a predetermined period. A report will not be sent by the system unless this confirm link is activated. Includes an automated installation script.

Resource Specifications	
Version:	1.0
Platform(s):	Unix
Price:	Freeware
Date Added:	Jun 13th, 2001
Last Updated:	Jun 13th, 2001

Average Visitor Rating:  **3.00** (out of 5)
