# libident.php

Hits: 1,942

**Description:** libident.php is an RFC 1413 compatible PHP4 Ident client class. The Identification Protocol (a.k.a., "ident", a.k.a., "the Ident Protocol") provides a means to determine the identity of a user of a particular TCP connection. Given a TCP port number pair, it returns a character string which identifies the owner of that connection on the server's system.
