# Wireless Web Development with PHP and WAP

Hits: 2,882

**Description:** A comprehensive guide to how to use PHP alongside the wireless Web's standard languages, namely WML and WMLScript, to create truly dynamic and powerful wireless applications. This book is derived from the author's years of experience in both wireless development and PHP programming, showing the reader how to make the most of both technologies to create truly dynamic, scaleable wireless applications. PHP programmers will find the opportunity to use what they already know to create wireless applications, using concise, applicable examples that encourage readers to adapt the information discussed within the book to their own projects.

## Resource Specifications

<b>Version:</b>	Bk&Cd-Rom edition
<b>Platform(s):</b>	1893115933
<b>Price:</b>	\$44.95
<b>Date Added:</b>	Jul 12th, 2001
<b>Last Updated:</b>	Feb 19th, 2006
<b>Author:</b>	APress
