CountLogCreator

Hits: 644

Description: CountLogCreator sets up your own counter and page logging on as many pages with as many styles as you wish. CountLogCreator does it all for you automatically within your browser and without any configuration or setup. It automatically creates a sample HTML page containing the code. You can place your logo (or any other image) below your counter with a link to any URL. It includes the superb AXS Site Tracker as logging module. Requirement: SSI required.

Resource Specifications

Platform(s):	Unix
Price:	\$49
