PHP-Ping

Hits: 26,840

Description: Update: Security Fix, \$count was not sanitized, now fixed! Enjoy.
Update: Works now with 4.2+ (register_globals change). Updated form validation (security). PHP-Ping is a PHP script to ping from your server. The author writes "I was looking for a easy ping script and didn't found one, so I wrote this one. Just one file, a single line to configure.". Update (Aug. 2002): no more errors with new PHP versions.

not secure, Aug 6th, 2003

Reviewed By: micneon

In the Count file you can put other entries and that isn't secure.

example : 4; ls; echo

put it in the script and it was secure:

```
$count= preg_replace ("/^[0-9]/", "", $count);
```
