[Open Bulletin Board](#)

One of the best!, Jul 1st, 2003

Reviewed By: The Wolf

I first started using phpbb2 on my web site, switched to yabbse, got sick of it, then moved to openbb!

OpenBB is:

- 1) Fast and reliable.
- 2) In constant development.
- 3) Feature ritch.

Enjoy this baord, it is the best!

Wow! What a great board!, Jan 29th, 2002

I've used everything from XMB to phpBB, and I just have to say that OpenBB is by far the best alternative to a commercial board. Whenever I've had an issue, the support and developers have been courteous, patient, and very professional. If you want a fast, stable board loaded with features and backed by top notch support, I'd recommend checking out OpenBB!

Great Board, Feb 4th, 2002

Fast and easy to customize. With OpenBB Final just around the corner it's sure to be the best free PHP board out there.

It's very nice!, Dec 9th, 2001

I've seen and used many boards and i really like this one, it looks a little like vBulletin but's free.

They say it had some bugs in the past, but i never had any problems with it, i recommend it to everyone

Still a long way to go!, Oct 29th, 2001

This version replaces Blaze Board and I admit a lot of time and effort has been put into the frontend design of of the board. However, the backend still requires a great deal of work! This version is still as buggy as Joe's Apartment.
