This is simply remarkable. Beautifully crafted IPFM allows me to grant my forum mods some personal webspace and I knew they wouldnt use up more than my limit of 30 MB each. Its features are massive, a brilliant little script.

Great tool, Sep 2nd, 2001

The file manager is a great tool. You can list your Webpage dir from every Browser without FTP , you can edit files, rename them and upload new files. All actions can you do with nice graphical interface, clearly structured. Definitely best!!!

The BEST WEB FTP out of 1000s I have ever used!, Sep 27th, 2001

Reviewed By: Web King

This is one of the excellent Web-based FTP programs. You will be surprised if you try it.

It is so extremely easy to configure and includes a grear admin control center too. You can create/edit/remove user levels (admin/user).

The good thing about this is you can "CHMOD" WOW

I give this a 5 stars!

The developer must have a demo so you can see how excellent it is. But you won't be disappointed when you download and use it.

Excellent For Newbies!, Sep 16th, 2003

If you don't have a clue what you're doing and all you know is that you need a web-based file manager, IPFM is for you! Trust me.. upload, chmod a couple of things and voila! you're up and running. Try it!

This thing is totaly rocks!, Dec 5th, 2004

I used it for sometime, and i really like it! :)

I recommand everyone about version 2.0 because it have much more great features. :)
