Newsletter Script (for use with IBM DB2 and other ODBC) Hits: 4,422

Description: DB2 Newsletter is an easy to install newsletter script written in PHP. It allows users to subscribe and unsubscribe to/from the list and allows you to send email to all subscribed users (bcc). It includes a duplicate email checking function and an easy to use Administration section. This script has been modified by 180°(for use with DB2 (ODBC). The original code is by Carlo Ackermann (Mailing List part).
