ChartDirector (COM/ASP/VB Edition)

Hits: 5,497

Description: ChartDirector is a powerful charting component for creating professional and clickable charts for web and windows applications. It's unique layering architecture enables you to synthesize the charts you want using standard chart layers. ChartDirector's comprehensive chart styles include pie, donut, bar, line, spline, step line, trend line, curve-fitting, inter-line coloring, area, scatter, bubble, floating box, box-whisker, waterfall, finance (numerous indicators support), gantt, vector, radar, polar, rose, and angular and linear meters and guages. ChartDirector charts are interactive with full suite of mouse events, supporting tool tips, clickable chart objects, and "drag to zoom" and "drag to scroll" features. AJAX enabled features allow charts to update without refreshing web pages. Easy to use and with comprehensive documentation. Come with numerous examples. Free trial available.

Resource Specifications

Version:	4.1
Platform(s):	windows
Price:	Free Trial/\$99
Date Added:	Oct 2nd, 2001
Last Updated:	Aug 31st, 2006
Author:	Advanced Software Engineering
