## puzzle

Hits: 6,977

**Description:** This script consists of two parts. The first concerning the "puzzlecenter" allows you to let your visitors choose among any number of pics, and pieces to puzzle with (columns&rows). It includes the ability to finish puzzle automatically by using the "need help?" link. The script sets each activated (while draggin) piece to 50% transparency, and the same goes for the puzzlecenter which is draggable to by pressing the mouse over the upper field "PuzzleCenter." Taking out the "puzzlecenter," you can display one pic with a fixed amount of columns and rows. Again, only one pic is needed (it is divided into pieces by the script), and you can optionally use another pic as background.

### Resource Specifications

<b>Version:</b>	20031223
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Price:</b>	Free
<b>Date Added:</b>	Oct 9th, 2001
<b>Last Updated:</b>	May 11th, 2008
<b>Author:</b>	Andreas Berger
