evCal Events Calendar

Hits: 4,506

Description: evCal is a full-featured searchable events calendar that includes the ability to set recurring events on a daily, weekly, monthly, yearly basis. For example, you can set an event to recur every 3rd Thursday of the month for x amount of months, or until a specified end date. Colors schemes are editable and can be easily added to match the look and feel of your site. In addition, the app makes use of header and footer, so you can integrate it seamlessly within your site's design. The calendar can be viewed in a monthly, weekly, or daily format. Users can sign up for events, and the information emailed to you.

Resource Specifications
