dgCharge

Hits: 970

Description: dgCharge is an ActiveX server component that provides online credit card processing capability for e-tailers of all types. e-tailers can process fully-secure credit card transactions directly from their website in a matter of seconds and completely eliminate costly Secure Gateways. dgCharge is available in two editions: Basic and Professional Edition. The Basic Edition supports merchants of automatic settlement type, and does not provide databases of on-line credit card transactions and settlements. The Professional Edition Supports both manual and automatic settlements, and maintains three databases: a merchant database that contains all of the information about your merchant account(s), a transaction database that contains all information about all transactions for each merchant, and a settlement database that contains information about settlements.

Resource Specifications

Version:	1.0
Platform(s):	Win NT
Price:	\$499/\$2,799
