DirectoryPass

Hits: 17,943

Description: DirectoryPass is a very powerful, yet simple to use .htaccess management system. It enables the user to administer both .htaccess and .htpasswd files to setup password protected directories and to add and remove users. DirectoryPass automatically generates .htaccess files and is compatible with Cobalt RAQ and Windows .htaccess. DirectoryPass allows administration of an unlimited number of .htaccess and .htpasswd files within a particular users account/server. Installation involves uploading one file, configuration is via the web browser. Software interface includes translations in French, German, Italian, Spanish Portuguese, Japanese and Turkish.
