TeeKai's Guestbook

Hits: 9,795

Description: This is a clean-interfaced guestbook script written in PHP and JavaScript. It features emotion face images that you can use to display your feeling. Also includes an admin section where you can delete unwanted messages. You can also edit, reply and delete the user comments. Includes ability to change username and password, Lost password retrieval, and more. Version 1.52 added the function, which will be cut the long word and see what's link, what's email.
