**Description:** The editor takes as input a given DTD, and automatically builds a palette containing the elements defined in the DTD. Users can thus create/edit/expand any document derived from that DTD, by using a visual tree-directed paradigm. The visual paradigm requires a minimum learning curve as only valid constructs/elements are presented to the user in a context-sensitive palette.

## Resource Specifications

<b>Platform(s):</b>	Unix, Win 95/98/NT, Mac
<b>Date Added:</b>	Nov 2nd, 2001
<b>Last Updated:</b>	Nov 2nd, 2001
