In-portal CMS - Possibilities are Endless Hits: 42,926

Description: In-portal CMS is a revolutionary website platform that allows you to automate and facilitate management of website or portal of any complexity. In-portal CMS contains the core functionality for running a basic website and already deployed in 80+ countries around the world. Flexible template system with ability to integrate your own designs and 100% quality PHP code along with an intuitive Admin Panel give you a quick and effective way of managing your website. Additional features are provided in separate modules like - In-Commerce (Online Store), In-Auction (eBay Auction Management), In-Link (Web Directory), In-Edit (Content Management System), In-News (News & Events Management) and In-Bulletin (User Forums). Each of these modules has its own features, allowing you to install only functionality needed in your website. Monthly updates and a constantly growing community add value to your investment. Visit In-portal website for a complete list of features and a free, hosted 30-day trial.

Management systems with lots of options, Jan 15th, 2007

Reviewed By: rockiniowa

This is a great management system. You have control in just about everything, from web design, search engine weight algorithm, labels, link items, etc. It takes a while to figure out, but once you do it, you are ready to go. I purchased the package that has a links directory, a message board and a news article management system. The software is great, but not necessarily for the first-time user.

In-Portal, In-News, In-Link, In-Edit, Feb 5th, 2007

Folks - I started 10 years back to find a good portal and could not find one, so ended up writing one up by hiring a programmer, in short, cost a bundle, tons of pain. Around 3+ years ago, came across In-Link software, and was just amazed with so much features and ease of use. I switched over, and since - history is made of which they have come up with other modules and they continue to upgrade more features, each one better than the other. I'd highly recommend them - plus great support team.

The Most Robust CMS on the Market!, Dec 22nd, 2007

I have been using the In-Portal Platform for three years now, and every year I am blown away by the enhancements and excellent customer support. This highly intuitive, link-based CMS platform has add-on modules for News (which supports RSS), Bulletin Board, and Commerce Store. I have seen many systems of less quality costing tens of thousands of dollars (if not more) in the enterprise / government and corporate environments. The In-Portal platform is the best CMS value you will find!
