yappa

Hits: 13,042

Description: Yappa (Yet Another PHP Photo Album) is designed to be easy to install and use image gallery script. Simply put the yappa.txt under the name index.php on your web server, and voila, it's ready to use. At first time, you will get your password for administration, and all operations for adding, removing or comment pictures are done via the web interface. easy upgrade to a new version too, in one click link. Need system() and mail() for best performance.
