Simple Login/Registration Using Flash with PHP and MySQL Hits: 13,397

Description: This tutorial assumes that you have some basic knowledge of PHP and MySQL, and a good understanding of Flash 5 Actionscript. This tutorial shows you how to set up a table in a MySQL database, then using PHP (or asp with a few minor changes) manipulate that table and interact with Flash. This is a much more of a hands on tutorial so it's helpful if you follow the scripts and Fla source included, in addition to viewing the working example at the same time.

i had never found such a easy script. It is a self explaining script

i like it

thanks
