X-Hive/DB

Hits: 7,831

Description: X-Hive/DB is a state-of-the-art native XML database that stores, searches and retrieves XML documents in a fast and scalable manner. Its ability to instantly locate and retrieve the smallest element within very large documents or collections of documents, sets it apart from alternative XML storage solutions. X-Hive/DB supports open standards to ensure ease of programming and effortless integration. Features include XQuery, Persistent DOM, XPath, XPointer, XLink, Version Management, BLOB support, Flexible indexing methods, Full-text searching, WebDAV, FTP server, J2EE support, DOM Level 3 Abstract Schemas, DOM Level 3 Load/Save and XUpdate.
