# AdRevolver Banner Manager

Hits: 4,361

**Description:** AdRevolver Banner Manager software provides cost-effective solution for banner advertising on medium and high traffic web sites. It can display up to 6 million accurately targeted banners per day. There is also a low-cost version for using on low-traffic sites. AdRevolver Banner Manager works on Unix and Windows server platforms, using any SQL-compatible database, including MySQL. The script allows you to easily organize your site(s) as well as provides you and your advertisers with convenient tools for conducting all sorts of advertising campaigns (CPM, CPC, CPA, Time Frame and mixed). You can pass site management duties to other members of your team by creating separate Sub-admin terminals. AdRevolver Banner Manager supports all banner formats: images (GIF, JPG, PNG), rich media banners (Flash, HTML, Java).
