htaccess Membership Program, Feb 25th, 2002

Reviewed By: neilg58

I have been using this program for several months now.

At first it was usable in its most basic sense.

However, I've had numerous conversations back and forth with the authors and they have customized it for me perfectly.

I run an active membership site and their program has all the features I need to manage the comings and goings of my members.

I recommend it highly
