1-Code Free Affiliate Code Generator

Hits: 2,800

Description: 1-Code is a Perl CGI script that allows you to give your sales partners correct HTML code for ClickBank affiliate links. Their ClickBank IDs are automatically inserted into your sales link to ensure proper credit of an affiliate sale.

The simpler it is for your partners to get the link, the more likely they will put it on their Web sites More affiliates using your code means more sales from your site.
