Advanced Log Analyzer

Hits: 4,445

Description: This powerful web site traffic analysis software produces a huge amount of traditional reports like visitor referrer sites, hits and hosts per day, visitor counter, most popular search engines and search keywords. It has plenty of untraditional statistics like visitor paths and patterns, web models. Supports Apache and IIS log formats. Works as GUI, Console or CGI application. Easy to install and use, very fast. Good documentation is included.

Resource Specifications
