AJScroller

Hits: 26,372

Description: Create cross-browser DHTML scrollers for your web site with AJScroller Creator quickly and easily. You can create professional horizontal, vertical and image scrollers with the builder software for your web site without any programming knowledge.

You can run multiple scrollers on the same page, with full dynamic control over each scroller. Full HTML syntax is supported, which means you can add images, format and align text quickly and easily.

As you build the scroller, you can preview it on-the-fly within the program. The entire design process is fast, convenient and easy.

Compatible with Netscape, Internet Explorer, FireFox, Opera, Mozilla, Konqueror, Galeon and Safari browsers

I thought this script would be just what I needed. I really liked how simple it was to let you create the scroller but once I hit preview it completely froze my computer and I had to shut it down. To find out it gave me the virus java bytrever.a I would not download or use this script.
