Cross Browser Ticker

Hits: 11,166

Description: This is a Cross Browser Javascript Ticker that runs on MSIE as well as Netscape. This ticker is very easy to customise. You can add any number of messages and their corresponding URLs. Messages must be added to the array ticker_msg and the URLs must be added to the array ticker_url. This ticker ticks the messages on a button. You can change the style of the button easily. The ticker speed can be changed easily by modifying the value of the variable ticker_speed. (Here it is 1, which means that the message would change every 1 second.)

Resource Specifications

Price:	Free
