Visitor Tracking

Hits: 3,687

Description: Web Traffic Analysis and Web Statistics software for tracking site visitors in your WEB SITE, WEB STORE, or web applications. Bar charts are included for trend analysis over a rolling 60-day period. The program records each visitor's referrer and IP address for validating advertising investments so that you can see where money is best spent. Visitor Tracking is unique among web statistics software because it connects all of the page visits for a visitor and creates a VISITOR PROFILE... allowing you to track their footsteps through a web store or web application. By using a permanent keyed-cookie for authentication, each visitor's history is kept intact for years after their initial visit. It can be used with your existing web site/apps or WITH OUR OTHER ASP SOFTWARE for: SHOPPING CART, contact management, help desk (CRM), calendars, invoicing, time sheets, inventory and project management.

Resource Specifications

Version:	2.0
Platform(s):	windows
Price:	\$45.00
Date Added:	Mar 4th, 2002
Last Updated:	Jul 26th, 2007
Author:	Surf Highway Software

Average Visitor Rating:  **4.86** (out of 5)

Number of Ratings: 28 Votes

Average Member Rating:  **0.00** (out of 5)
