**Description:** SACphp is a fully-featured, modular, multilingual, and scalable framework/Weblog/CMS. It's focused on speed and security. Many blocks could be integrated from kernel or third parties.

It has modules such news, real integrated search engine forums, stats, links, downloads, articles, fortune, polls, events, guestbook, etc. It also has extensible group and user permissions, and a flexible look and feel through templates and CSS.

It can export several kinds of data in XML format.

The installation and administration is Web-based, but this is switchable via PHP-GTK.

Written in Spanish. (arg).
