TelPad

Hits: 4,259

Description: TelPad is a system that allows you and your users to store their addresses. It has the admin and user area. In admin area you can edit the user's info. Users can register automatically and have their own place to store contacts. They can change password, import, export contacts, search and do many other things. It is very simple to install and have great interface. The script comes with cool images, information and installation notes.
