ASP WebTracker

Hits: 1,792

Description: Webtracker allows you to get clear statistics on which pages of your site are receiving the most hits on daily basis. It also keeps track of referring websites and the amount of times a website has referred visitors to your site. By just inserting one line into your pages you can see what is going on, which pages are popular and which aren't, who has referred the most traffic to your site, the total amount of visitors that visited your website.

Resource Specifications
