Index Server Basics, Jan 20th, 2003

Reviewed By: gbarber

A really well written article on Index Server Basics. I hopes that more articles from this author will follow, such as search pages with multiple fields, searches via pull down menues, searching for metatags etc. Perhaps another piece on the idq and htx files we hope! Granted, this is "for beginners only" article, but I wish I had this when I was a beginner!
