Not only is this FREE but the chat is multi compatible with several servers and OS's. The system is very basic but with a small knolage of codeing easy to customise. A great code easy to use and looks good. Go to the home page and test the on-line demos for your self.

I give it 4 out of 5

**The Best chat I know!**, Mar 7th, 2003

I think, this is the best chat. It uses NO MySQL, but it has the Best Admin-Configuration, I know. There I can insert more than 300 Smilies, create new rooms and and and. It will be updated every time! The Board-Support is super. So, thats the Best chat I know. Maybe the static should be work without a Cronjob and the user should see just, that be said after his Log in. He shouldN't see that, what be said before the user has log in!

PS: My English is not very good, I`M sorry! °\_°
