Build a FAQ is cool, Sep 1st, 2003

Reviewed By: aldoseri

Build a FAQ is really an easy to setup script and Manage, not only that but it is also very powerfull and logically designed, As a MAC user i thrive on ease of use which i know it is harder to make applications look and feel easy, Good job and i wish you luck - just one thing that you might need to fix or maybe it is only on my server, Please add "--" 2 dashes after the first line in all scripts or you will get an internal server error [premature end of script] otherwize this is cool script
