## idBB (Internet Discussion Bulletin Board)

Hits: 12,018

**Description:** idBB is an open source forum project, which is easy to use, and very stable. It has its own template system, which lets users use any template installed. Users can also change the forum language to their own language. Includes an easy to use, step by step installer. It also supports the most common BBcodes. Features a private message system; supports multiple boards on one database; admin section to manage users, forums, categories and admins, and view idBB source. Also supports private forums, which allows different type of groups to have their own private forums.
