ASaP! (PHP)

Hits: 6,776

Description: Search, Modify, Add, and Delete online Records. Using ASAP you connect to your Access, SQL or MySQL database, choose necessary fields, design the color scheme and then generate PHP pages and upload those pages to your ISP within the program. Features include DropDown Lists, Relational Capabilities, Password Protection, Image & Hyperlink Support. Template feature allows you to use a pre-existing look from your website to maintain that look in your generated page. *** New HTML area feature allows you to add or edit fields using user friendly HTML tags (content manager) ***. Shopcart Version will allow you to turn your database into an online shopcart.

PHP ASaP Rocks!!, Dec 2nd, 2004

Reviewed By: rdority

This product is a delightful addition to my Web design toolbox. It works out all the tedious details in helping me connect my attractive Web pages to a database, making them dynamic so I can easily impress my clients who need me to do more than just design nice looking Web pages!! With this app I can get a jumpstart on just about any Web application my clients need!

This little gem of a program did everything I needed it to do. I've paid more for similar tools that don't even measure up to ASaP. Every serious web professional should have this tool. I was able to get a real estate listing up and going in under an hour. Bravo to the developers and they give excellent support and customer service.
