# E-Gantt

Hits: 5,674

**Description:** E-Gantt is an open source QPL'd class library for displaying interactive Gantt Charts. Key features include: Clean Model View Controller design; Realtime event support; Simple integration with JTable. Designed for easy integration into project planning and scheduling systems. This service release fixes up many efficiency problems reducing drawing bottle necks by around 60% and removes a nasty image clipping bug. The applet demo has been patched to work with Netscape. New features include the first release of the pie demo, line chart demo as well as support for tooltips.
