Great all-purpose addition to PostNuke!, Jan 28th, 2003

Reviewed By: kld

If you have content you want to add to your PostNuke site that doesn't fit neatly into the standard categories ("news", "articles", etc.), just install this module and you can add regular full-sized html pages, and create menus to navigate them. I include this module with all my PostNuke installations. It's a great all-purpose content manager for PostNuke.
