# ExtraSQL

Hits: 2,482

**Description:** ExtraSQL is a fully featured tool for Microsoft Database Engine (MSDE) 7.0/2000 and Microsoft SQL Server 7.0/2000 users and developers. It is able to create and manage any SQL server objects: databases, tables, stored procedures, views, indexes etc., execute SQL commands and provides an easy to use and navigate multi-tabbed MDI environment. All standard SQL Server administration commands and wizards can be invoked just by one mouse click.
