# Innovate Send-Any-Form PHP Version

Hits: 1,402

**Description:** Send-Any-Form PHP form processor has all the functionality of its Perl based counter part. The script can process and forward any form it is sent and redirects the user to a page of your choice or simply confirms the output using its built-in standard page. Send-Any-Form PHP comes with a Javascript based form generator and the original Perl version of send-any-form.

## Resource Specifications

|                      |                                   |
|----------------------|-----------------------------------|
| <b>Version:</b>      | 1                                 |
| <b>Platform(s):</b>  | linux, windows, freebsd           |
| <b>Price:</b>        | \$2                               |
| <b>Date Added:</b>   | May 24th, 2002                    |
