It should have been named "Money Cloaker", because after they get their money the Cloak them selves.

Save You Money, It Does Not Work, You Can't Get Support, and You Will Be Black Flagged From Most of The Search Engines For Using It. BE VERY CAREFUL!

Works fine., Dec 17th, 2004

We have 3 domains cloaked with SEC and over 20 domains that aren't. The cloaked pages get listed, build page rank faster and are hit more often than even our oldest traditional and un cloaked pages.

The support is fine for a product with this modest price tag, and very competent.

I have used this software for 2 years now and can promise you it has excellent success.

The new extractor add on Peter has created is a super plus to the software programming A+ grade work.

Software auto updates new vision and spyders.

There is also a forum where help is always the internet away. Software users like me post to help and get help as need. I have used other cloaker, but this software is easy to use with No experience needed. So that the truth and I am sticking to it.

I think it is an excellent product, Dec 18th, 2004

It works fine. Maybe you don't know how to use, or maybe you were doing something illegal with it. Anyway, support is great for this product. You just buy it and become member of their support forum. There you will find help from the script's creators as well from other users.

Best Software of It's kind!, Dec 18th, 2004

I am new to this whole search engine thing and I still don't know enough about it to fill up a thimble, but I installed this software a few days ago (it was a breeze to install) and my site was spidered by Teoma and Yahoo! yesterday!

Best Cloaking Software Available Hands Down!!, Dec 19th, 2004

Search Engine Cloaker is an outstanding product. I've used it for 2 years, have raised my daily traffic to a consistent 1000 daily targeted visitors and growing. My experience with support issues has been excellent over a 24 month period. Feature requests are taken seriously by the software author and if found to be beneficial are always included in free upgrades. The software grows better and better with every update and I've found no cloaking software that is even remotely as versatile, effective or safe to use. According to reports, less than 0.0005% of users get their domains blacklisted or banned for using the software. This is 1/2000 users. Though generally a risky practise, SEC makes the act of cloaking relatively risk-free. As a seasoned user, I HIGHLY recommend it!
