# 12react.php

Hits: 3,188

**Description:** 12react can be used to offer visitors of your site the ability to react to certain things on your site. These things can be news-items, pictures, you, etc. The script can handle multiple reaction pages but as reaction page to your entire site it could also function as a guestbook.

The script comes with an extra script that easily installs the MySQL database for you. Apart from the database login parameters, you don't need to do anything else. The script uses a text variable and can be easily changed into another language. Default language is English.

## Resource Specifications
