rwAuction Pro v6.0

Hits: 10,789

Description: The largest improvement for v6.0 is the invoice system which replaces the two previous 'C2C Invoices' and 'DirectB2C Sales' into a single system. Besides facilitating transactions between users, this version also improves on organizing listings by region and listing format.

rwAuction Pro covers a vast range of vertical markets and business models. At its core and primary focus, rwAuction Pro allows you to create your own auction marketplace. It can become an open channel to enable buyers and sellers to transact while charging for listing options, optional membership plans, and maintaining control over sellers and listings. This type of scenario is often used for new or existing businesses to start online niche, collectible, or regional focused markets.

When installed, you will have a fully functional online auction website. Advanced administration options include: translation, seller and listing approvals, category restrictions, CSV listing uploads, and more.

OK, for small sites, Sep 26th, 2004

Reviewed By: pels

This is a nice looking package, but for the way it is priced, you would expect a bit more from it. It is not built for large scale sites, has poor management tools when you have allot of users or activity.

Rainworx, Auction software, Mar 25th, 2006

Reviewed By: stampandcoin

Rainworx auction software offers a simple basic platform in need of some serious upgrades. There are no shopping carts, delete button for completed item, edit button for completed item, and any way for the seller or buyer to complete a transaction. The software lacks many of the basic essentials for even a basic auction.

The software is over priced for what you get. They are very eager to program custom work but for a high price tag.

Save yourself time and money, go with another vendor.

Auction Software by Rainworx, Jun 14th, 2006

Great program! Easy to use, works perfect! Handles high volume traffic with no problem. Customer support is exemplary!

Excellent Support and Highly Customizable!, Aug 4th, 2006

Reviewed By: ginaoneil

I've been using the auction software for almost 3 years. It has been a pleasure customizing it to my site's needs. When I come across changes that I am technically unable to do, I hire Steve and the Rainworx staff to do the changes for me. The custom work is extremely affordable and done very quickly. It has saved many hours of my time over the last 3 years. There has never been a change that could not be made! Every aspect of the programming is customizable. The customer support is Excellent!

Stable program, good features, excellent support, Oct 5th, 2006

Reviewed By: wiley1

The program is very stable and has good features; it can also be customized even if you know basic asp/html. The support is great from Steve, usually receiving an email within the day, or next day max. I tested other auction programs; some were not as stable; each and every time I have accessed my site the program works efficiently. One note, not all webhosts will support asp applications so best to inquire first. Overall this is a very good program with a very good support team.
