## admin-Login-Only

Hits: 22,580

**Description:** admin-Login-Only software lets you easily add password protected pages to your website using a PHP session. Log in once with a username and password, then browse any combination of protected or open pages - then return to a protected page without having to log in again. Useful for a control panel or administration page/s or other sensitive pages you want to protect. Easily change the single password. Add or remove pages under 'admin-Login-Only' protection by adding just one line of code! Log Out with a mouse click. No knowledge of PHP necessary. +++ Why Use it? +++ Control access to sensitive web pages and information, compatible with PHP 4.1.2 or higher, no database needed, ignore the authentication mess your server uses, fast, free and stable, enjoy quick and easy setup with sensitive web pages you need to protect now. NEW! Includes support for PHP Superglobals and a check version capability for latest version check. FREE download, live test on sample site available. Much more!

### Resource Specifications
