Locked Access Perl

Hits: 2,704

Description: With Locked Access you can set up a directory on your server that only members can see. The members use the easy to use registration form validate their account and start browsing. As the admin you can do things like deleting members, viewing statistics, turning your registration on/off and much more. The project is still under development but you can visit our forums and get the latest dev news as well as information our other projects including Locked Access PHP and Locked Access HTML.
