## Camzor Webcam Applet

Hits: 16,418

**Description:** Camzor is a webcam applet that includes many features: Auto refresh at a specified amount of seconds; Add a text overlay; Zoom and Pan around the image; Open a document/image on click - Use for thumbnail display. Never again will your visitors see a broken image. If Camzor tries to refresh while you are uploading a new image, it will just pause and try again without showing a broken image. Includes example html documents to get you up and going with your webcam right away. Works with all browsers that support Java, and all versions of Java.
