FriendlyPrint

Hits: 6,068

Description: FriendlyPrint allows you to turn any page into a printer-friendly document without having to create a totally new page for each one. The script removes all your "interface graphics" and other unwanted graphics that just waste printer ink. All you have to do is create a link to the script, and instantly a printer-friendly version of the page is produced. A very useful tool for sites with articles.

Resource Specifications

Version:	2.0
